Professional Objective

Product Developer, Front End Developer, or Full Stack Developer focused on digital products, user experience, and business impact.

Professional Summary

Product oriented software developer with experience in web and mobile development as a Full Stack and Front End engineer. Experienced in digital product environments, startups, and global remote teams, with international exposure and fluent communication in English. Strong focus on user experience, usability, engagement, and business impact, participating across the full product lifecycle from ideation to launch and continuous improvement. Skilled in React, React Native, JavaScript, TypeScript, Node.js, and Python, with experience integrating APIs, databases, and dashboards. Uses artificial intelligence strategically to improve productivity, code quality, and development efficiency. Communicative, collaborative, and self driven professional, comfortable bridging technical and non technical stakeholders.

Languages

English: Proficient;

Spanish: Intermediate;

French: Intermediate;

Italian: Intermediate.

Professional Experience

TeuTeuf Games

International educational digital games company based in Ireland, operating globally with remote teams.

Full Stack Product Developer | November 2024 to Present

→ Working as a Full Stack developer on educational web games, contributing to both new products and the evolution of the existing portfolio
→ Participating throughout the full product lifecycle, including ideation, backlog planning, UI design in Figma, development, testing, launch, and iteration
→ Developing and maintaining Front End applications using React, Vue, and Svelte, and supporting Back End services with Node.js and Python, including API and route development

- → Implementing continuous UX and engagement improvements, such as easter eggs, new result sharing features, and user retention mechanics
- → Updating interfaces with modern UI concepts focused on usability, accessibility, and retention
- → Maintaining legacy codebases, fixing bugs, implementing new features, and evolving both visual and functional aspects of products
- → Developing dashboards and handling integrations between Front End and Back End systems
- → Collaborating in a fully remote, asynchronous, and international environment with fluent English communication
- → Using AI tools extensively as development copilots, especially ChatGPT and Claude, to solve problems, accelerate delivery, and improve code quality
- → Using Notion for project management, technical documentation, test tracking, and task organization

CI&T

Global technology, digital transformation, and AI consulting company with enterprise scale projects.

Mid Level Systems Analyst, Front End | June 2024 to March 2025

- → Worked on enterprise level projects for Nestlé, supporting the development of the Nespro application used by sales teams for professional coffee machine supplies
- → Translated business requirements into technical solutions, delivering well documented code aligned with architectural guidelines and corporate standards
- → Developed, maintained, and documented Front End features with strong focus on code quality, performance, and user experience
- → Actively participated in agile ceremonies, including refinements, plannings, reviews, and daily meetings
- → Performed testing, validation, and bug fixing to ensure solution stability and reliability
- → Investigated and resolved issues related to code, data, and environments
- → Used the company's internal AI development tool, Flow, to support development activities
- → Stayed up to date with technology trends and best practices

GAtec Gestão Agroindustrial

Mid sized software and systems integration consultancy for the agribusiness sector, operating nationally.

Software Developer, Mobile and Front End | November 2021 to June 2024

- → Developed mobile applications for agroindustrial management, including pest control, yard logistics, CRM, and inventory management
- → Built Front End mobile applications using React Native
- → Structured and componentized application architecture
- → Integrated applications with Back End APIs and services using Realm MongoDB
- → Designed and executed functional tests with real world application usage

- → Created user documentation and support materials using Figma
- → Produced technical documentation using Azure DevOps and Markdown
- → Published and maintained applications on Google Play Store and Apple App Store

Ecopack Brasil

Global large scale manufacturer of sustainable baking molds and packaging for the food industry.

International Trade Assistant | August 2021 to November 2021

- → Supported the development and management of customer portfolios across Latin America
- → Conducted customer prospecting and supported international commercial negotiations
- → Handled product quotations, pricing, and technical follow up with clients
- → Coordinated logistics, shipping, and international transportation processes under different INCOTERMS

L&L Products

Global applied engineering and materials science company serving automotive, industrial, and residential sectors.

Junior Sales Engineer, Key Account Manager | September 2020 to December 2020

- → Managed technical and commercial customer portfolios in automotive and commercial segments
- → Acted as a focal point between customers, engineering, manufacturing, and internal teams
- → Conducted market, competition, and new business opportunity analysis
- → Supported technical project development from specification and documentation through delivery
- → Participated in product development processes, design reviews, and engineering change approvals

Education

Bachelor's Degree in **Mechanical Engineering, Control and Automation**

FHO, Fundação Hermínio Ometto, Brazil

2014

Extension Program in **Mechanical Engineering**

University of Campinas, Brazil

2017

Courses and Certifications

- → **Advanced React,** Meta, 2026
- → **UX Design,** Google, 2023

→ Ignite React and React Native, Rocketseat, 2021

→ Cambridge CAE C1, Oscars Institute, Dublin, 2019

→ Complete Web Design, HTML5, CSS3, JavaScript, Udemy, 2021

→ Modern Web Development with JavaScript, Udemy, 2021

Core Skills

→ Product oriented web and mobile development

→ Full Stack experience with React, React Native, JavaScript, and TypeScript

→ Experience with Node.js, Python, APIs, and dashboards

→ Strong focus on user experience, usability, and business impact

→ Strategic use of artificial intelligence to improve productivity and code quality

→ Clear communication in international and remote work environments

Additional Information

→ International professional experience with work in Ireland

→ Ongoing personal project focused on cultural curation and critical film discussion

→ Previous experience as an English teacher and school coordinator

→ Available for remote, hybrid, on site work, and travel

→ Driver's license, category AB
